Where are we going? How do we get there?

Please join us for a conversation with UIC Engineering and Education faculty members about perspectives and professional journeys linking work within the STEM fields to contemporary concerns for social justice. We hope for a wide-ranging yet informal discussion about issues such as inequitable access to STEM fields, sociopolitically responsive research, and how academic and industry spaces must also change.

Our panelists include:

Jeremiah Abiade, Mechanical and Industrial Engineering
Renata Revelo Alonso, Electrical and Computer Engineering
Gregory Larnell, Curriculum and Instruction
Carmen Lilley, Mechanical and Industrial Engineering
Daniel Morales-Doyle, Curriculum and Instruction
